MOBILE DEVELOPMENT / EGYPT

Muhammad Aziz

Flutter & Firebase Developer | Full-Stack Mobile Apps

Aziz.4cs@gmail.com · +20 1148 003 003 · Online portfolio · GitHub · Upwork

I build iOS and Android apps, from Flutter interfaces and Firebase backends to API integrations, in-app subscriptions, and store releases. I use Clean Architecture and BLoC/Cubit to keep apps maintainable as they grow.

I started in native Android and moved into cross-platform mobile development. My work spans app architecture, feature development, backend integrations, and subscriptions.

6+	7	450k+	~4.6 / 5
Years in mobile development	Published Flutter apps	Google Play downloads	Across 5,100+ Google Play reviews

TECHNICAL SKILLS

Mobile development Flutter, Dart, Java, native Android, SQLite, Clean Architecture, BLoC/Cubit

OTHER EXPERIENCE

Senior Flutter Developer · 2023 - 2025
Developed Flutter interface features for a chess game variant in a milestone-based engagement.

Mobile Subscription Integrations · 2023
Integrated RevenueCat subscriptions and added pricing tiers to existing mobile apps.

Selected apps

ChildRoo

01 / PARENTING / IOS & ANDROID

ChildRoo helps parents manage their child's sleep and daily routines. Its interactive schedule adapts when naps or feeding times change, and the app offers sleep plans, lessons, and access to sleep consultants.

Flutter · Firebase · Arabic RTL
